

Webinar Reflection

This document should be completed when the webinar has ended and emailed to the instructor of the session to receive flex credit hours.

What is a current instructional practice that you will refine as a result of your participation?

What is something that you will implement in your instructional practice based on the knowledge you gained during this webinar?

What is a goal for your future practice?

How will you know when you have reached your goal? What are ways you will know that this goal has been achieved?

Something that I want to explore further and learn more about as a result of this webinar is:

What are some of the ways that the information you learned can be shared with others? What groups of people would benefit most from participating in this learning?
