POINTS OF CLARIFICATION TO RFP#FY240401 HEALTH AND WELLNESS CENTER SERVICES FOR IHBC

There are two current Health and Wellness Centers shared by seven governmental entities: City of Bartlett, Bartlett City Schools, Collierville Schools, Town of Collierville, Lakeland School System, City of Lakeland, and Arlington Community Schools. The funding for the Health and Wellness Centers for primary, acute, and urgent care, generic medication dispensing, related laboratory services, and disease management, is paid out of the Interlocal Health Benefit Plan Asset Trust. Currently, services are available for those covered members and their covered dependents of the IHBC Health plan.

Additional services (those not normally included in a health plan) may be requested by individual entities, and the successful proposer must be able to “split out” the billing for these additional services for each entity, i.e. workers’ comp services may be desired for one entity but not others, special immunizations may be requested by another entity, Fire fighter physicals by still another entity. Obviously, it would be inappropriate for all entities to pay for services being rendered for which they are not participating.

Coverage by Relationship Class

Population: MSSC

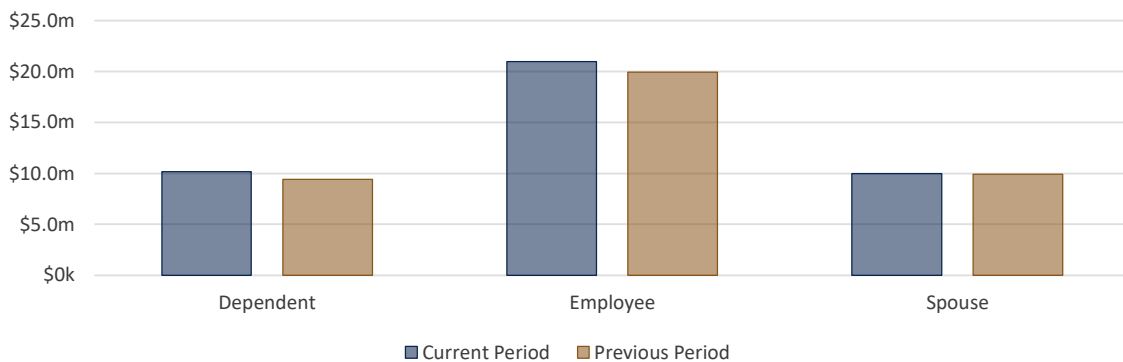

This report presents the membership and healthcare costs by claimant relationship class. It shows employee, spouse, and other dependents' contribution to the overall population costs. Plan design, including employee cost share, can have significant impact on the coverage of spouses and dependents. The percent change (%Δ) from the comparison period to the reporting period is shown to facilitate analysis of how changes in enrollment by relationship affect costs.

Expense Distribution

Population: MSSC

All members in the population are ranked by total paid amount. Both medical and pharmacy costs are included. Using this ranking, members are broken into % of total population groupings. Both current member(s) and termed member(s) are included in the analysis. The top 5% of the population generally accounts for a higher percent of the total costs than all the other percentage groups combined, and represents a key group of individuals to focus care management activities on.

Shock Claimants - Reporting Period Jul 2022 to Jun 2023

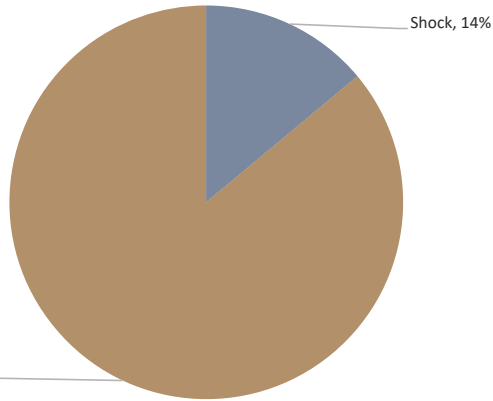

Population: MSSC

The shock claimants listed represent every plan member who incurred medical and pharmacy costs totaling 50% or more of the Specific Deductible, or in this case, \$250,000.00+. These costs can fluctuate from year to year and cannot necessarily be controlled through plan changes.

The concurrent model uses a given year claim data to calculate the individual risk scores for the same time period. Each risk score is a measurement of what an individual's assessment period risk typically would be, based on his or her condition profile, when compared to the average MARA calibration population. The concurrent risk score is used as an explanatory tool to identify the Expected level of a given year's healthcare expenditures, which are known (actual costs).

The prospective model utilizes medical claim history from the assessment period to predict risk scores for each individual for a subsequent time period. The risk scores represent the predicted health status for a 12-month projection period. The MARA prospective model forecasts risk for the 12-month period immediately following the end of the report period.

Care Alert Score Summary for Chronic Conditions

Care Alert Scores are calculated using the logic and algorithms of the quality metrics. Each quality metric is clinically weighted and grouped by condition and category. Condition by condition scores are calculated and then adjusted to account for differences in condition risk, prevalence, and quality standards.

The resulting scores are reportable at both the individual and population level for each credible condition category and the roll-up categories. Higher scores (max = 100) indicate a greater risk of future risk based on members' non-compliance with quality standards. Lower scores (min = 0) indicate that members' are more compliant with those standards, thus minimizing future risk.
